GEARBOX

High reliability, compact volumes and easy construction are among the main characteristics of new CHIARAVALLI planetary gearboxes.

As one of the main advantages, our planetary gearboxes can be easily assembled with electric and hydraulic motors, worm gearboxes (CHM series) and input shafts.

Furthermore, they can be assembled with different output flanges or shafts, all these characteristics

make them suitable for several industrial applications. CHIARAVALLI planetary gear boxes are available in linear version (CHPL) and angular one (CHPLB).

Our range covers 11 transmission sizes, from 100 daNm up to 3500 daNm, rate reductions from 3.55:1 to 3422:1 and more with four reduction stages (these available upon request).

CHIARAVALLI planetary gearboxes are available at anti rusted treated blank surface ready to be painted.
